

# Exterior Waterproofing

**FORTRESS**  
STABILIZATION SYSTEMS

505 20TH STREET NORTH, BIRMINGHAM, AL. 35201

Fortress Stabilization is a pioneer in developing products and procedures that will add new life to existing structures. Fortress tests different products, materials, epoxies and application techniques in order to deliver the strongest, most durable, and versatile structural reinforcements.

- Cost effective
- Non obtrusive - lay flat to substrate
- No destructive attachments made to the floor or ceiling
- Inclusion of Kevlar provides additional shear strength
- Grid is fully encapsulated in epoxy anchoring it in place
- Able to conform to bowed walls
- Can be painted for a smooth clean look
- Quick labor saving installation
- Carbon fiber grids are more than three times stronger
- The Fortress Clean-Peel backing strip provides a clean prepared bonding surface
- Pre-mixed toughened epoxy
